Dashboard Stats

Disk Space Used (MB)

0.0 / 50 MB

This indicates the amount of storage currently consumed by your account. Out of the total 50 MB allocated storage space, only 0.0 MB has been used, leaving sufficient space for additional products, images, videos, and other content.

Products Added

0 / 20

This metric shows the number of products that have been created in the system. Currently, 0 products have been added out of the maximum limit of 20 products allowed for this account.

Published Products

0 / 4

Published products are those that are visible and accessible to end users. Out of the 4 products created, 0 products have been published successfully and 0 product remains unpublished or in draft status.

Published Categories

0 / 2

Categories help organize products into logical groups for easier navigation and management. All 2 available categories have been published and are currently active.

Published Videos

0 / 0

This section displays the number of videos that have been published. Currently, no video content has been uploaded or published under this account.

Summary

The account is utilizing minimal storage space and has successfully published most of its available content. Product categories are fully published, while one product remains unpublished. No video content has been added at this time.

Disk Usage (Mb)

Disk Usage

The Disk Usage section provides a detailed overview of storage consumption across categories and products. It helps administrators monitor how much disk space is being utilized by uploaded assets such as logos, banners, images, and other media files.

Home Disk Usage

Home Disk Usage represents the total storage consumed across all categories, products, and associated media assets within the account.

Disk Space Used: 0 MB

Since no media files have been uploaded in this example, the total disk usage remains 0 MB.

Categories Disk Usage

The Categories Disk Usage table displays the storage utilized by category-related assets.

Category	Logo Disk Usage (MB)	Banner Disk Usage (MB)	Total Disk Usage (MB)	Full Disk Usage (MB)
Category 1	NA	NA	0	0
Category 2	NA	NA	0	0
Category 3	NA	NA	0	0

Field Description

- **Category:** Name of the category.
- **Logo Disk Usage (MB):** Storage consumed by the category logo.
- **Banner Disk Usage (MB):** Storage consumed by the category banner image.

- **Total Disk Usage (MB):** Combined storage used by category assets.
- **Full Disk Usage (MB):** Total storage associated with the category.

Example

In this sample scenario, Category 1, Category 2, and Category 3 have been created without any uploaded logos or banners. As a result, all disk usage values remain 0 MB.

Product(s) Disk Usage

The Product Disk Usage table displays the storage utilized by individual products and their associated assets.

Product	Logo Disk Usage (MB)	Banner Disk Usage (MB)	Total Disk Usage (MB)
Product 1	NA	NA	0
Product 2	NA	NA	0
Product 3	NA	NA	0
Product 4	NA	NA	0

Field Description

- **Product:** Name of the product.
- **Logo Disk Usage (MB):** Storage consumed by the product logo.
- **Banner Disk Usage (MB):** Storage consumed by the product banner image.
- **Total Disk Usage (MB):** Combined storage used by all product assets.

Example

In this sample scenario, Product 1 through Product 4 have been created without any uploaded logos, banners, or media files. Therefore, all products display a disk usage value of 0 MB.

Disk Usage Summary

Metric	Value
Total Disk Space Used	0 MB
Categories Using Storage	0
Products Using Storage	0
Uploaded Logos	0
Uploaded Banners	0

Overview

The Disk Usage module enables administrators to track storage consumption across categories and products. In this example, no media assets have been uploaded, resulting in zero disk space utilization across all sections. This indicates that the full storage allocation remains available for future content uploads.
