# Files (Font)

# Overview

The **Font** section allows administrators to upload and manage custom font files used within the application. These fonts are primarily used to customize the appearance of text displayed on the Kiosk, ensuring it matches the desired branding and design requirements.

Custom fonts can be used for headings, product names, category titles, buttons, and other supported text elements.

---

# Font Library

Navigate to **Files → Font** to access the Font library.

All uploaded font files are available here and can be used wherever custom fonts are supported.

---

# Add Font

To upload a new font:

1. Navigate to **Files → Add Files**.
2. Drag and drop the font file into the upload area or click **Drop files or click here**.
3. Select the required font file.
4. Click **Submit** to upload the font.

If no file is selected, the system displays:

> **Please add a file first.**

---

# Font Usage

Uploaded fonts are primarily used to customize text displayed on the Kiosk.

Fonts can be applied to supported text elements such as:

- Headings
- Product Names
- Category Titles
- Buttons
- Labels
- Other supported text components

Once the font is uploaded, it becomes available for selection in the Kiosk Font Settings.

---

# Edit Font

To modify an uploaded font:

1. Navigate to **Files → Font**.
2. Select the required font.
3. Update the **Title**, if required.
4. Click **Update** to save the changes.

---

# Font Details

The **Edit Font** page contains the following field:

| Field | Description |
| --- | --- |
| **Title** | Displays or updates the name of the uploaded font. |

---

# Delete Font

Administrators can permanently remove fonts that are no longer required.

To delete a font:

1. Open the required font.
2. Click **Delete**.
3. Confirm the deletion.

> **Warning:**
> Deleting a font may affect the appearance of Kiosk content that is currently using that font.

---

# How Fonts Work

When a custom font is required for the Kiosk, administrators must first upload the corresponding font file in the **Font** section.

After uploading, the font becomes available in the **Kiosk Font Settings**, where it can be assigned to different text styles such as **Regular**, **Bold**, **Italic**, and **Bold Italic**.

This allows organizations to maintain consistent branding and customize the overall appearance of the Kiosk interface.

---

# Best Practices

- Upload supported font file formats.
- Use meaningful font names for easy identification.
- Verify the font appearance before applying it to the Kiosk.
- Keep only the required fonts in the library to maintain better organization.

---

> **Important:**
> After uploading or editing a font, click the **Update** button to save the changes. The uploaded font can then be selected from the **Kiosk Font Settings** and applied to supported text elements.

---
