Kiosk Flash Banner

Overview

The **Kiosk Flash Banners** section allows administrators to configure promotional banners that appear at different positions on the kiosk screen. Flash banners can be used to display advertisements, announcements, promotional offers, or branding content while customers interact with the kiosk.

Navigate to **VirtuKiosk → Kiosk Flash Banners** to manage flash banner configurations.

Add Kiosk Flash Banner Configuration

To create a new flash banner configuration:

1. Navigate to **VirtuKiosk → Kiosk Flash Banners**.
2. Click **Add New Kiosk Flash Banners Configuration**.
3. Configure the required banner settings.
4. Upload banner images for the desired positions.
5. Click **Submit** to save the configuration.

Banner Configuration

The following settings are available:

Setting	Description
Size	Defines the display size of the flash banners.
Available On	Select where the banners will be displayed (e.g., Both layouts).
Position	Choose the location where the banner should appear.

Setting	Description
Mode	Select the banner display mode (Banner).

Banner Positions

Flash banners can be displayed at the following positions on the kiosk screen:

- **Leaderboard Top**
- **Leaderboard Bottom**
- **Skyscraper Left**
- **Skyscraper Right**

Each position can have its own set of banner images.

Upload Banner Images

Administrators can upload banner images using the **Drag & Drop** area or by clicking to browse files.

The following upload rules apply:

- A maximum of **4 images** can be uploaded for each banner position.
- Supported image dimensions must be between **10 × 10 px** and **4000 × 4000 px**.

Separate upload sections are available for:

- **Leaderboard Top**
- **Leaderboard Bottom**
- **Skyscraper Left**
- **Skyscraper Right**

Manage Flash Banners

Administrators can:

- Create new flash banner configurations.
- Upload banner images.

- Configure banner positions.
- Adjust banner size.
- Edit existing configurations.
- Delete unused banner configurations.

Best Practices

- Use high-quality banner images for better visibility.
- Maintain consistent banner dimensions across all positions.
- Avoid uploading more than four images per banner position.
- Preview banners on the kiosk before deployment.
- Update promotional banners regularly to keep content fresh.

> **Important:**
> Flash Banners are displayed at predefined positions on the kiosk interface. Configure the required position, upload the banner images, and save the configuration to display promotional content on the kiosk.
