Videos (Add Videos)

Overview

The **Add Video** section allows administrators to upload videos that can be displayed within the application. Each video can include a title, description, and the associated video file.

Add a New Video

To upload a new video:

1. Navigate to **Modules → Videos → Add Video**.
2. Enter the required video details.
3. Upload the video file.
4. Click **Submit** to save the video.

Video Fields

Field	Description
Video Title	Enter the title of the video. Maximum **255 characters**.
Description	Enter a brief description of the video. Maximum **5000 characters**.
Video File	Upload the video file that will be displayed in the application.

How to Upload a Video

1. Enter the **Video Title**.
2. Add a **Description** (optional but recommended).
3. Click **Choose File** and select the desired video from your device.
4. Verify all entered information.

5. Click **Submit** to upload and save the video.

Best Practices

- Use a clear and descriptive **Video Title**.
- Add a meaningful **Description** to help users understand the video's content.
- Ensure the selected video file is correct before uploading.
- Keep video content relevant to the associated application or product.

> **Important:**
> The video will **not be uploaded or saved** until you click the **Submit** button.
