Videos (Video)

Overview

The **Videos** section allows administrators to view, edit, and manage all uploaded videos. Administrators can update video information, assign products and categories, and control the visibility and playback settings of each video.

Edit Video

To modify an existing video:

1. Navigate to **Modules → Videos**.
2. Select the video you want to edit.
3. Update the required information.
4. Click **Submit** to save the changes.

Video Details

Field	Description
Video Title	Enter or update the video title. Maximum **255 characters**.
Description	Enter or modify the video description. Maximum **5000 characters**.
Select Products	Associate the video with one or more products.
Select Category	Assign the video to the appropriate category.

Video Management Options

The following actions are available for each uploaded video:

Option	Description
Published	Makes the video visible within the application.
Unpublished	Hides the video from the application without deleting it.
Muted	Plays the video without audio.
Unmuted	Enables audio playback for the video.
Delete	Permanently removes the selected video from the application.

How to Edit a Video

1. Open **Modules → Videos**.
2. Select the required video.
3. Update the **Video Title** or **Description**, if needed.
4. Select the appropriate **Products**.
5. Assign the required **Category**.
6. Configure the required video options such as **Published**, **Muted**, or **Unmuted**.
7. Click **Submit** to save the changes.

Best Practices

- Use descriptive video titles for easier identification.
- Assign videos to the correct **Products** and **Categories** for better organization.
- Publish videos only after verifying their content.
- Use the **Mute** option when videos should play without audio in kiosk environments.
- Delete videos only when they are no longer required.

> **Important:**
> Any modifications made to a video, including product assignment, category selection, publish status, or audio settings, will **not be applied until you click the `Submit` button**.
