Assets

Overview

The **VirtuWeb Assets** section is used to manage assets associated with the VirtuWeb website configuration. It provides an option to add a website favicon, which is displayed in the browser tab or other browser interface areas.

Navigation Path

Navigation Path: VirtuBox → Settings → VirtuWeb → Assets

Website Favicon

The **Website Favicon** section allows users to add a favicon for the website.

Available Options

Option	Description
Website Favicon	Displays the section for managing the website favicon.
Add	Allows users to add a favicon to the website configuration.

How to Add a Website Favicon

Follow these steps to add a website favicon:

1. Open the VirtuBox backend.
2. Navigate to **VirtuWeb → Assets** from the left sidebar.
3. Locate the **Website Favicon** section.
4. Click the **Add** button.
5. Select or upload the required favicon using the interface provided.
6. Complete any additional required steps to save the favicon.

Left Sidebar Navigation

The left sidebar contains multiple configuration sections.

Important Notes

- Add the appropriate favicon to customize the website's browser icon.
- Verify that the favicon has been saved successfully.
- The available fields and upload options may vary depending on the backend configuration.

Conclusion

The **VirtuWeb Assets** section provides an option to add a website favicon and access other website asset settings. Proper configuration helps maintain consistent website branding and presentation.
