Project Summary

Overview

The **Project Summary** section provides an overview of the project's basic information, current configuration, and usage statistics.

Project ID

The **Project ID** is a unique identifier assigned to the project. It is automatically generated by the system and is used to uniquely identify the project.

Project Name

The **Project Name** displays the name assigned to the project. This name is used throughout the system to identify the project.

Website

The **Website** field contains the URL of the website associated with the project. Selecting this link opens the project's website.

Owner

The **Owner** field displays the name and email address of the account that owns the project.

App Page

The **App Page** indicates which page is currently configured as the home page for the mobile application.

Web Page

The **Web Page** indicates which page is currently configured as the home page for the website.

Published

The **Published** status indicates whether the project has been published and is available for use.

- **Yes** – The project is published.
- **No** – The project is not published.

Searchable

The **Searchable** status indicates whether the project can appear in search results.

- **Yes** – The project is searchable.
- **No** – The project is hidden from search results.

Private

The **Private** status indicates whether the project is private.

- **Yes** – The project is accessible only to authorized users.
- **No** – The project is publicly accessible, subject to other project settings.

Disc Space

The **Disc Space** field shows the amount of storage currently used by the project out of the default allocated storage limit of **50 MB**.

Pages

The **Pages** field displays the total number of pages created within the project.

By default, a project can contain up to **5 pages**.

Files

The **Files** field displays the total number of files uploaded to the project, including images, videos, audio files, documents, and other supported file types.

SKUs

The **SKUs** field displays the total number of Stock Keeping Units (SKUs) created within the project.

Bookmarks

The **Bookmarks** field displays the total number of bookmarks created in the project.

Addresses

The **Addresses** field displays the total number of addresses stored within the project.

Language

The **Language** field displays the language currently configured for the project.

Currency

The **Currency** field displays the currency currently configured for the project. This currency is used wherever monetary values are displayed throughout the project.
