VirtuApp (Android) - Version 10.10

Android Release Notes

Build Version: 10.10
Release Date: 16 july 2026
Platform: Android
Release Type: Feature Release

Overview

This release introduces the **FlipBook** feature to VirtuApp, allowing PDF documents to be displayed in an interactive page-flipping experience. Users can now open supported PDF files directly within the application using a realistic book-style interface, providing a more engaging document viewing experience.

New Features

FlipBook Layout

A new **FlipBook** layout has been added to VirtuApp.

This layout allows PDF documents to be displayed using a realistic page-flipping interface instead of the standard PDF viewer.

Key Features

- Interactive page-flipping animation.
- Optimized PDF rendering for improved performance.

- Native support for PDF documents uploaded through the VirtuBox Console.
- Integrated with the existing Files module.
- Supports opening documents directly inside VirtuApp.

How to Use (VirtuBox Console)

Follow these steps to configure a FlipBook:

1. Open the **VirtuBox Console**.
2. Create a new page or edit an existing page.
3. Add a **FlipBook** layout.
4. Upload or select a **PDF** document.
5. Ensure the selected file is:
   - A valid **PDF** document.
   - Available for the **VirtuApp** platform.
6. Save the page.
7. Sync or publish the project.
8. Open the page in VirtuApp.
9. Tap the FlipBook section to open the document in FlipBook mode.

> **Note:** Only PDF documents are supported for FlipBook.

Summary of Changes

Module	Change
FlipBook	Added a new FlipBook layout for displaying PDF documents with an interactive page-flipping experience.
Document Viewer	Introduced an OpenGL-based FlipBook viewer for supported PDF files.

Compatibility

- Supported Platform: Android
- Supported File Type: PDF
- Requires VirtuApp project synchronization after configuration.
